

## Ready to get started?

---

As a Partners 4 Patients practice, you join hundreds of distinguished health care professionals nationwide who are **dedicated to excellence in arthritis and rheumatic disease care.** Contact us any time to discuss how we can improve patient outcomes together.

# A Powerful Partnership to Improve Patient Health

---

# A Collaboration to Improve Patient Outcomes

As a member of a health care practice dedicated to treating arthritis and other rheumatic diseases, you know patients with these conditions need more than excellent medical care. **That's why we're focused on innovating how we collaborate and communicate with health care providers to improve outcomes for patients and their families.**

Partners 4 Patients is a unique collaboration between the Arthritis Foundation and health care practices that provide the gold standard in arthritis and rheumatic disease care. By working together, we will improve patients' physical, emotional and social health, as well as their experience of care.

Here's how our partnership benefits your practice, your patients and their families:

## More Time to Focus on Patient Care

We'll support your patients and their families between visits, decreasing office calls and administrative tasks. This includes practical resources, community support and access to our licensed clinical social workers.

## More Insights on the Patient Population

We'll share our patient-reported outcomes to address trends and challenges together.

## More Educated and Engaged Patients and Families

We'll help prepare your patients for more productive and efficient office appointments.

## More Visibility that Elevates Your Commitment to Care

We'll recognize your leadership within the patient and medical communities.
