

# Michigan: Why Arthritis Matters

Arthritis affects **32%** of the population in Michigan. That's **2,305,000** adults living with doctor-diagnosed arthritis in the state.

- There are over **54 Million** American adults with doctor diagnosed arthritis in the U.S.
- 1 in 3** veterans has arthritis, which accounts for **13.3%** of the people in Michigan living with arthritis
- There are approximately **300,000 kids** with arthritis in the U.S. but only about **390 pediatric rheumatologists**. That's about 700 kids for each doctor.

## Over 24 million Americans experience activity limitations due to their arthritis.

- 1,125,000** adults in Michigan have activity limitations caused by arthritis
- Among all adults in Michigan with arthritis, **43.7%** have work limitations
- Arthritis in the U.S. has an economic burden of **\$304 billion** – made up of medical expenses and lost wages

## Adults with arthritis often have one or more chronic conditions.

- Mental Health:** Anxiety and depression affect **1/3** of U.S. adults with arthritis 45 years of age or older
- Diabetes:** **56.2%** of adults in MI with diabetes also have arthritis
- Heart Disease:** **63.1%** of adults in MI with heart disease also have arthritis
- Obesity:** **41.5%** of adults in MI who are obese also have arthritis

## You can make a difference by advocating for state and federal legislation that will help people with arthritis in Michigan. Legislative priorities for 2019 include:

- Out-of-Pocket Cost Limits:** Legislation that tackles high out-of-pocket costs for specialty medications
- Step Therapy:** Legislation that addresses burdensome use of step therapy, or “fail first”, which can restrict access to needed therapies
