

# Kansas: Why Arthritis Matters

Arthritis affects **25%** of the population in Kansas. That's **536,000** adults living with doctor-diagnosed arthritis in the state.

- There are over **54 Million** American adults with doctor diagnosed arthritis in the U.S.
- 1 in 3** veterans has arthritis, which accounts for **17.2%** of the people in Kansas living with arthritis
- There are approximately **300,000 kids** with arthritis in the U.S. but only about **390 pediatric rheumatologists**. That's about 700 kids for each doctor.

## Over 24 million Americans experience activity limitations due to their arthritis.

- 258,000** adults in Kansas have activity limitations caused by arthritis
- Among all adults in Kansas with arthritis, **36.4%** have work limitations
- Arthritis in the U.S. has an economic burden of **\$304 billion** – made up of medical expenses and lost wages

## Adults with arthritis often have one or more chronic conditions.

- Mental Health:** Anxiety and depression affect **1/3** of U.S. adults with arthritis 45 years of age or older
- Diabetes:** **53%** of adults in KS with diabetes also have arthritis
- Heart Disease:** **56%** of adults in KS with heart disease also have arthritis
- Obesity:** **32.8%** of adults in KS who are obese also have arthritis

## You can make a difference by advocating for state and federal legislation that will help people with arthritis in Kansas. Legislative priorities for 2019 include:

- Step Therapy:** Legislation that addresses burdensome use of step therapy, or “fail first”, which can restrict access to needed therapies
- Workforce:** Legislation that addresses the pediatric rheumatology workforce shortage through federal loan repayment programs
